WORKING EXPERIENCE

ProCorp Solution s.r.o., Prague

09/2023 - Backend Developer - present

- Developed and maintained client-focused applications and web services across multiple domains.
- Working on solutions including e-commerce platforms, logistics systems, administration tools, and API services.
- Took primary ownership of the backend architecture and implementation, with occasional contributions to frontend development.
- Worked primarily with PHP, with additional experience in Python, TypeScript/JavaScript, jQuery, HTML/CSS, and C#.
- Used frameworks such as Laravel, Slim (API), FastAPI, Django, Express.js, Node.js, React, .NET, and WordPress.
- Utilized modern DevOps and infrastructure tools including GitLab CI/CD, Docker, Helm, Terraform and AWS.
- Implemented monitoring and error tracking using Sentry, and worked with messaging systems like RabbitMQ.
- Integrated analytics and tracking tools such as Google Tag Manager (GTM) and Google Analytics (GA)

Česká spořitelna, a.s., Prague

08/2022 - 09/2023 - Process Designer/Front-End Developer

- Working on and maintaining bank's internal application (new features, fixing bugs).
- Mainly using Typescript / JavaScript, FreeMarker Template Language
- other techstack Jenkins, Openshift, Bitbucket
